The Azerbaijan company Azerinsaatservis LLC. completes the preparations for the soil bed of “Baku Ring Road 1” motorway

The preparations for the soil bed of “Baku Ring Road 1” motorway has been completed by the Azerbaijan company Azerinsaatservis LLC. Ilkin Imamaliyev, Marketing Manager of the Company, made a statement in this regard.

According to I. Imamaliyev, the issues regarding the installation of telecommunication on the motorway were solved. Construction of the bridge and transportation of the telecommunication by Akkord Company, subcontractor of the project, are in progress.

According to the company representative, it is projected that the motorway will be put into service in the autumn of 2009.

Furthermore, it should be emphasized that the length of the motorway, which will link Bileceri Slope and Lökbatan Ring, is 21,5 km and the preliminary total value of the project is US\$ 49,5 million. The Ring Road shall link the main roads at the border of Baku-Russia, the border of Baku-Alat-Gazah-Georgia and the border of Baku-Iran.

The motorway shall have 6 lanes and a width of 22,5 meters.

US\$ 14,9 million by Kuwait Development Fund (Foundation), US\$ 10 million by Abu-Dabi Arabic Development Fund (Foundation) and US\$ 3,5 million by the Government of Azerbaijan have been allocated for the project. Arabic financial institutions have made allocations for 20 years with 2,5% loan rate and privilege for the first 4 years.
