Azerinsaatservis LLC. starts to construct the second section of the tunnel linking Baku Ring Road and Baku-Guba-Russia State Border Motorway

Azerinsaatservis LLC

Baku, Azerbaijan

2009/09/10

Azerinsaatservis LLC. started to construct the second section of the “Bridge-1 Project” which will link Baku Ring Road and Baku-Gubya-Russia State Border Motorway within the scope of the “Project for the Construction of Baku Ring Road”.

It is projected that by means of the tunnel to be constructed within the scope of the “Bridge-1 Project”, which will link Baku Ring Road and Baku-Gubya-Russia State Border Motorway, the motorway coming from the direction of Elet through Baku Ring Road will link with Baku-Guba-Russia State Border Motorway and Baku International and Intercity Bus Terminal. The tunnel is constructed in such a way to cross under the bridge on the 17th km of Baku-Guba-Russia State Border Motorway having a heavy traffic.

Pursuant to the project, the tunnel shall be 75 m long and 18 m wide. It shall comprise of 2 lanes each of which will be 3,75 m wide. The width of the intended pavement will be 1,25 m.

Currently, 90% of the works in the first section of the tunnel has been completed. Preparation works for the construction of the second section are still being carried out; the necessary technological tools and equipment are brought to the construction site. The geodesists have started to work on the construction site and it is planned that the excavation works will be commenced in the second section this afternoon.

Vehicle movement in the direction of Baku-Sumgayit has been restricted under the supervision of BDYP and the necessary environment has been created for the safe movement of vehicles. As an alternative to the restriction of vehicle movement in this direction, it is possible for vehicles to move in the direction of Sumgayit through Bileceri Downgrade.

Regarding the construction works, all security measures have been taken and the necessary road markings and informative signs and warning and safety signs have been placed. In the area where excavation works shall be carried out all measures have been taken for ensuring safety. The areas of excavation works shall be illuminated at night.

It is planned that Azerinsaatservis LLC. will complete the construction works conducted in accordance with the “Bridge-1 Project” within the scope of the “Project for the Construction of Baku Ring Road” by the end of the year.

Having been founded in 2003, Azerinsaatservis LLC. has turned into one of the leading companies in the construction of roads and railways in Azerbaijan and the Caucasus. The Company, which offers high-quality service, renders all kinds of services from A to Z in its primary field of business, namely in the construction of roads and railways, with its own possibilities.
