Azerinsaatservis LLC. resumes the construction of Baku-Tbilisi-Kars Railway in Georgian section in March

*Azerinsaatservis LLC.
Baku, Azerbaijan
2009/01/13*

Constructing Baku-Tbilisi-Kars railway's Axalkalaki-Kartsaki-Turkey state border railway section within the borders of Georgia, the Azerbaijani company Azerinsaatservis LLC. shall resume works in March due to adverse weather conditions.

According to the Company's Board Member, Vüsal Aslanov, it is impossible for employees to continue work and for heavy vehicles to operate in the open air because of heavy snow which started on 15 December. "We have suspended the construction works. During the preparation of the preliminary project, we encountered certain technical problems since the geology was not known for certain. It was concluded that everything would be re-learned and a new project would be prepared. However, the railway will be constructed in complete compliance with the European standards and the preliminary plan will not be amended", he said.

Construction of Axalkalaki-Karsaki-Turkey state border railway was commenced on November 2007. The project financed by the Azerbaijan Government Budget is worth US\$ 79 445 612.

Having been founded in 2003, Azerinsaatservis LLC. has turned into one of the leading companies in the construction of roads and railways in Azerbaijan and the Caucasus. The Company, which offers high-quality service, renders all kinds of services from A to Z in its primary field of business, namely in the construction of roads and railways, with its own possibilities.
