Azerinsaatservis LLC. starts to construct the bridge linking Baku Ring Road and Baku-Guba-Russia State Border Motorway

*Azerinsaatservis LLC.
Baku, Azerbaijan
2009/06/01*

Azerinsaatservis LLC. started to construct the “Bridge-1 Project” which will link Baku Ring Road and Baku-Gubya-Russia State Border Motorway within the scope of the “Project for the Construction of Baku Ring Road”.

By means of the tunnel to be constructed within the scope of the “Bridge-1 Project”, which will link Baku Ring Road and Baku-Gubya-Russia State Border Motorway, the motorway coming from the direction of Elet through Baku Ring Road will be linked with Baku-Guba-Russia State Border Motorway and Baku International and Intercity Bus Terminal. The tunnel will be constructed in such a way to cross under the road on the 6th km of Baku-Guba-Russia State Border Motorway having a heavy traffic. Preparation works are rapidly carried out. Plastering works within the framework of the project are currently being conducted. Additionally, regarding the construction works, the direction of the communication lines running through the region has been changed.

Vehicle movement on Baku-Gubya-Russia State Border Motorway has been partly restricted due to the execution of the construction works in accordance with the permission letter N:15/4244 of BDYP and the following conditions required by the letter have been met:

- creating the necessary environment for the safe movement of vehicles on Yeni Yasamal-Gurd Gapısı road;
- illuminating the areas where excavation works are carried out;
- ensuring that road freight vehicles enter Baku from the direction of Sumgayıt through Yeni Yasamal-Gurd Gapısı road by installing the necessary road markings.

As a result of the measures taken in accordance with the above listed requirements of BDYP, movement of the vehicles driving in the direction of Sumgayıt-Baku from Baku-Gubya-Russia State Border Motorway has been stopped for the construction of the tunnel’s first section. Movement of the road freight vehicles driving in that direction has been directed to Metbuat Street and Badamdar County through Hiyabani Street running through Yasamal Region. On the other hand, movement of passenger cars has been directed to the tunnel in the direction of Baku-Sumgayıt coming from the opposite direction. For the purpose of ensuring traffic safety, driving lane of the vehicles moving in the opposite direction has been separated by placing barriers into the middle section. The said 200-meter-long direction links with Sumgayıt-Baku tunnel again.

All security measures have been taken so as to ensure traffic safety on Baku-Gubya-Russia State Border Motorway and the necessary road markings and informative signs, warning and safety signs have been placed. An informative sign indicating the period of time during which construction-repair works are carried out has been placed on the site. In the area where excavation works shall be carried out all measures have been taken for safety. The areas of excavation works shall be illuminated at night.

It is planned that Azerinsaatservis LLC. will complete the construction works conducted in accordance with the “Bridge-1 Project” within the scope of the “Project for the Construction of Baku Ring Road” within 3 months.

Having been founded in 2003, Azerinsaatservis LLC. has turned into one of the leading companies in the construction of roads and railways in Azerbaijan and the Caucasus. The Company, which offers high-quality service, renders all kinds of services from A to Z in its primary field of business, namely in the construction of roads and railways, with its own possibilities.
